

Large Rope Igloo

Large Rope Igloo

The Large Rope Igloo, featuring rope climbers and a large upper rope net, is complemented by twelve sets of suspended balance stones. The structure is made of galvanised steel treated with a baked enamel finish - KOMAXIT. All joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and is characterized by high strength.

Specifications

The Large Rope Igloo is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	7.20 x 7.20 x 2.10 m (L x W x H)
Max. Fall Height:	up to 2.00 m
Safety Surfacing Area:	Ø 10.90 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners
