

Combined Rope Structure

Combined Rope Structure

This combined rope structure offers plenty of opportunities for fun. The structure includes a rope tunnel, balance steppers, two rope walls, a horizontal rope tunnel, and a large rope floor. The product is made of hot-dip galvanised steel with a high-quality surface finish; the joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength.

Specifications

The Combined Rope Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	10.30 x 4.60 x 3.20 m (L x W x H)
Max. Fall Height:	up to 2.10 m
Safety Surfacing Area:	13.60 x 7.70 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, stainless steel chains, polypropylene rope, stainless steel fasteners
