

Large Rope Course

Large Rope Course

Large rope course - an extensive course that offers plenty of play opportunities. Its impressive size attracts large numbers of children. The structure is made of galvanised steel finished with a baked-on powder coating (KOMAXIT). All joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases strength and resistance to mechanical wear. Polyester itself offers many benefits: it resists microorganisms and weathering, dries quickly after rain, is colorfast, and features high strength.

Specifications

The Large Rope Course is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	19.00 x 20.40 x 2.20 m (L x W x H)
Max. Fall Height:	up to 2.20 m
Safety Surfing Area:	23.20 x 24.60 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, polypropylene rope, stainless steel fasteners
