

Hanging Swing for Toddlers

Hanging Swing for Toddlers

A swing seat for the youngest children, suitable for nurseries and primary schools, is made of hot-dip galvanised steel finished with a stove-enamelled powder coating. The fasteners are made of stainless steel and covered with plastic protective caps to increase durability and safety. The structure's design allows several seats to be added in a row as needed. The swing is certified to STN EN 1176. A grass mat is recommended as the safety surfacing.
