

## Triple climbing wall

Triple climbing wall

The triple climbing wall is a large double-sided play element offering a variety of climbing activities and physical challenges. Three HPL climbing walls with integrated handholds are complemented by climbing poles and balance steps, allowing several children to use the element at the same time. The varied climbing activities naturally support the development of strength, agility, movement coordination and overall physical fitness. The steel structure with a durable surface finish is designed for long-term outdoor use. HPL components and stainless-steel fasteners contribute to high durability and a long service life.

### Specifications

The Triple climbing wall is certified according to STN EN 1176

|                               |                                                                    |
|-------------------------------|--------------------------------------------------------------------|
| <b>Age Group:</b>             | 3-14 years                                                         |
| <b>Product Dimensions:</b>    | 5.30 x 5.30 x 1.90 m (L x W x H)                                   |
| <b>Max. Fall Height:</b>      | up to 1.80 m                                                       |
| <b>Safety Surfacing Area:</b> | Ø 8.30 m (according to STN EN 1176-1)                              |
