

Single-Tower Combined Play Structure - Low

Single-Tower Combined Play Structure - Low

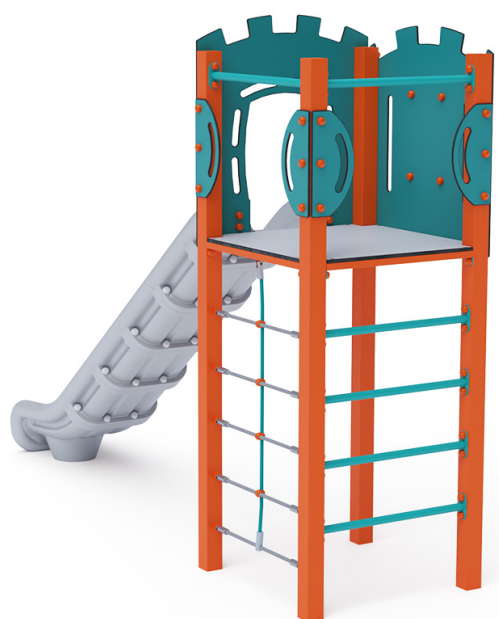

This single-tower combined play structure features a tower that children can climb via a ladder or rope climber and descend by sliding down the slide. The steel structure is weather-resistant thanks to hot-dip galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant, eliminating the risk of injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

The Single-Tower Combined Play Structure - Low is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.40 x 0.90 x 2.50 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	6.90 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
