

Double Balance Bridge

Double Balance Bridge

The Double Balance Bridge is a maintenance-free combination of a themed and rope bridge, designed to help children develop coordination, stability, and balance. Structures of this type are a particularly suitable choice for playgrounds intended for younger children, as the low height minimises the risk of falls. The structure is manufactured from hot-dip galvanised steel with a powder-coated finish. The ropes are made from polyester fibers wound around a central reinforcement, which increases rope strength and resistance to mechanical wear. Polyester offers a number of beneficial properties: it is resistant to micro-organisms and weathering, dries quickly after rain, is color-stable, and has high tensile strength. All fasteners are stainless steel. A grass surface may be used as safety surfacing beneath the product; however, the use of a grass-protection mat is recommended.

Specifications

Double Balance Bridge is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.90 x 1.00 x 1.30 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.90 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
