

Single-Tower Play Structure

Single-Tower Play Structure

This single-tower combined play structure features a tower that children can climb via a ladder or a sloped rope climber, then descend using the slide. Its green-brown design, inspired by nature, invites children to play from a distance. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage, eliminating the risk of injury from sharp edges or splinters. The posts are made of BSH glued laminated timber beams treated with a weather-resistant and UV-resistant coating. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

The Single-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	2.80 x 0.90 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.00 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
