

Five-Tower Combined Tower Set - Tall

Five-Tower Combined Tower Set - Tall

Five-tower combined play structure. Two towers with ramparts and three low towers are connected by a rope bridge, a rope balance bridge, and two tunnels. The play structure includes steps, sloped climbing walls, climbing bars, vertical climbing nets, ladders, and a slide. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Five-Tower Combined Tower Set - Tall is certified according to STN EN 1176

Age Group: 3-14 years

Product Dimensions: 6.50 x 6.30 x 3.60 m (L x W x H)

Max. Fall Height: up to 1.50 m

Safety Surfacing Area: 9.50 x 9.90 m (according to STN EN 1176-1)

Materials: Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
