

Five-Tower Play Structure

Five-Tower Play Structure

A five-tower combined play structure. Two towers with a small roof and three low towers are connected by a rope bridge, a balance rope bridge, and two tunnels. The structure includes steps, sloped climbing walls, climbing bars, vertical climbing nets, ladders, and a slide. The green-brown, nature-inspired design invites children to play from a distance. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or splinters. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Five-Tower Play Structure is certified according to STN EN 1176

Product Dimensions:	6.30 x 5.70 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	9.30 x 9.10 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
