

Four-Tower Play Structure

Four-Tower Play Structure

A four-tower combined play structure. Two towers with battlements and two low towers are connected by a diagonal rope wall, a rope bridge, and two tunnels. The structure includes steps, a sloped climbing wall, a climbing pole, a sloped rope net, ladders, and two slides. The green-brown, nature-inspired design invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so there is no risk of injury from sharp edges or splinters. The posts are made of BSH (glued laminated timber) beams treated with a weather-resistant and UV-resistant coating. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All connections are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Four-Tower Play Structure is certified according to STN EN 1176

Product Dimensions:	5.70 x 3.90 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	9.00 x 7.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
