

## Single-Tower Combined Play Structure - Tall with Swing

Single-Tower Combined Play Structure - Tall with Swing

This single-tower combined play structure features a tower with battlements, which children can climb via steps or a climbing wall with handholds, then descend using the slide. The play structure also includes a swing beam with a Classic or Baby seat. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, eliminating the risk of injury from sharp edges or splinters. All joints are stainless steel and covered with plastic protective caps for increased durability and safety.

### Specifications

The Single-Tower Combined Play Structure - Tall with Swing is certified according to STN EN 1176

|                               |                                                                                             |
|-------------------------------|---------------------------------------------------------------------------------------------|
| <b>Age Group:</b>             | 3-14 years                                                                                  |
| <b>Product Dimensions:</b>    | 3.70 x 4.80 x 3.60 m (L x W x H)                                                            |
| <b>Max. Fall Height:</b>      | up to 1.50 m                                                                                |
| <b>Safety Surfacing Area:</b> | 8.30 x 6.40 m (according to STN EN 1176-1)                                                  |
| <b>Materials:</b>             | Galvanised and powder-coated steel, HPL, LDPE, rubber, stainless steel fasteners and chains |
