

Single-Tower Play Structure

Single-Tower Play Structure

This single-tower combined play structure features a tower with a small roof, accessed by steps, with a slide providing a fun route back down. The play structure also includes a swing beam with two seats, either Classic or Baby style. The green and brown design, inspired by nature, invites children to play from a distance. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury to children from sharp edges or splinters. The posts are made of BSH timber beams treated with a weather-resistant and UV-resistant coating. All joints are stainless steel and covered with plastic protective caps for enhanced durability and safety.

Specifications

The Single-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.60 x 3.20 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	7.50 x 6.90 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, stainless steel fasteners
