

Double-Tower Combined Play Structure - Tall with Swing

Double-Tower Combined Play Structure - Tall with Swing

This double-tower combined play structure features one tower with ramparts and a second, lower tower, connected by a tunnel. Children can climb up via a climbing wall with handholds or a ladder, and come back down on one of two slides. The play structure also includes a mast with a nest swing. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This prevents injury to children from sharp edges or splinters. All joints are stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Double-Tower Combined Play Structure - Tall with Swing is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	8.00 x 5.20 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	10.00 x 10.10 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, Polyurethane, polypropylene rope, stainless steel fasteners and chains
