

Triple-Tower Combined Play Structure - Tall

Triple-Tower Combined Play Structure - Tall

Triple-tower combined play structure - the two outer towers are connected to the central tower with battlements by a rope bridge and a tunnel. Children can climb onto the structure via steps, a vertical climbing wall with handholds, or a climbing net, and can descend via one of three slides. The bold design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant. This eliminates the risk of injury from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical stress. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength. All joints are stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Triple-Tower Combined Play Structure - Tall is certified according to STN EN 1176

Age Group: 3-14 years

Product Dimensions: 5.80 x 4.10 x 3.60 m (L x W x H)

Max. Fall Height: up to 1.50 m

Safety Surfacing Area: 8.90 x 7.60 m (according to STN EN 1176-1)

Materials: Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
