

Double-Tower Play Structure

Double-Tower Play Structure

This combined double-tower play structure features a low tower and a tower with a small roof, connected by a tunnel. Children can climb up via steps, a ladder, or the climbing wall, and come back down using the slide. The green-brown, nature-inspired design invites play from a distance. The HPL panels used are chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and shatter-resistant, eliminating the risk of injury from sharp edges or splinters. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Double-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.00 x 1.00 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.30 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, stainless steel fasteners
