

Double-Tower Play Structure

Double-Tower Play Structure

This combined double-tower play structure features one tower with a roof and a second, lower tower, connected by a tunnel. Children can access the structure via a vertical or sloped climbing wall with handholds, steps, or a ladder, and come back down using the slide. The green-and-brown, nature-inspired design invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and shatter-resistant, eliminating the risk of injury from sharp edges or splinters. The posts are made of BSH laminated timber beams treated with a weather-resistant and UV-resistant coating. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Double-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.00 x 3.20 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.10 x 6.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, stainless steel fasteners
