

Double-Tower Play Structure

Double-Tower Play Structure

Combined double-tower play structure - two towers connected by a tunnel. Children can climb up via steps, a climbing wall with handholds, or an arch rope net, and come back down using one of three slides. The green-brown design, inspired by nature, invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - colorfast, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury from sharp edges or splinters. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is colorfast, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Double-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	6.30 x 3.20 x 2.00 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	9.90 x 6.60 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
