

Six-Tower Play Structure

Six-Tower Play Structure

A six-tower combined play structure. Three towers with roofs and three low towers are connected by a rope bridge, balance rope bridges, and a tunnel. The structure includes steps, sloped climbing walls, sloped rope nets, vertical rope nets, and three slides. The green-brown design, inspired by nature, invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so there is no risk of injury from sharp edges or splinters. The posts are made of BSH beams treated with a weather-resistant and UV-resistant coating. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases its strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Six-Tower Play Structure is certified according to STN EN 1176

Product Dimensions:	9.40 x 6.30 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	13.00 x 9.40 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, polyester ropes, stainless steel fasteners
