

Single-Tower Combined Play Structure - Low

Single-Tower Combined Play Structure - Low

A single-tower combined play structure - a tower that children climb using steps or a climbing wall, with a slide providing a fun route back down. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant and color-stable, non-toxic, recyclable, and resistant to breakage. This eliminates the risk of injury from sharp edges or splinters. All joints are stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Single-Tower Combined Play Structure - Low is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	4.10 x 0.90 x 2.50 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	7.70 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, stainless steel fasteners
