

Double-Tower Combined Play Structure - Tall

Double-Tower Combined Play Structure - Tall

This double-tower combined play structure features two towers connected by a rope bridge. Children can climb up via one of two climbing walls with handholds, a climbing net, or a ladder, and descend on one of two slides. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to hot-dip galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so there is no risk of injury from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Double-Tower Combined Play Structure - Tall is certified according to STN EN 1176

Age Group: 3-14 years

Product Dimensions: 6.20 x 3.70 x 3.60 m (L x W x H)

Max. Fall Height: up to 1.50 m

Safety Surfacing Area: 9.70 x 7.40 m (according to STN EN 1176-1)

Materials: Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
