

Double-Tower Combined Play Structure - Tall

Double-Tower Combined Play Structure - Tall

This double-tower combined play structure features two towers connected by a rope balance bridge. Children can climb up via steps, a sloped or vertical climbing wall with handholds, or a climbing net, and come down using one of two slides. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage, preventing injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement, a construction that increases the rope's strength and resistance to mechanical stress. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Double-Tower Combined Play Structure - Tall is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	4.50 x 3.40 x 3.60 m (L x W x H)
Max. Fall Height:	up to 1.50 m
Safety Surfacing Area:	7.50 x 6.90 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
