

Single-Tower Play Structure

Single-Tower Play Structure

This single-tower combined play structure features a tower that children can climb via steps or a climbing wall, then descend using one of two slides. The green-and-brown design, inspired by nature, invites children to play from a distance. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage. This prevents injury to children from sharp edges or splinters. The posts are made of BSH laminated timber beams treated with a weather-resistant and UV-resistant coating. All joints are stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Single-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.00 x 3.20 x 2.00 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.30 x 6.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, stainless steel fasteners
