

Medium Rope Igloo with Tunnel

Medium Rope Igloo with Tunnel

This medium-sized rope igloo features four rope climbing nets and a central tunnel, complemented by two sets of suspended balance stones. The product is made of galvanised steel with a high-quality powder-coated finish; connections are stainless steel and covered with plastic protective caps to increase the safety and service life of the joints. The ropes are made of polyester fibers with a steel core, wound around the center. This rope construction increases its strength and resistance to mechanical stress. Polyester itself offers many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength.

Specifications

The Medium Rope Igloo with Tunnel is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	4.90 x 4.90 x 2.20 m (L x W x H)
Max. Fall Height:	up to 2.20 m
Safety Surfacing Area:	Ø 9.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners
