

Rope Dome

Rope Dome

This large rope dome, made up of variously sized rope nets and plastic rings with cut-out handholds, offers plenty of play possibilities. Children can climb across its surface or enter the interior through open passageways. Inside, they can create their own hideout or simply hang and move hand-over-hand along the rope nets. The product is made of hot-dip galvanised steel with a high-quality surface finish, and the joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength.

Specifications

The Rope Dome is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.00 x 5.00 x 2.20 m (L x W x H)
Max. Fall Height:	up to 2.00 m
Safety Surfacing Area:	Ø 8.40 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners
