

Rope Structure - A-Frame

Rope Structure - A-Frame

A rope structure resembling a high mountain, just waiting to be conquered. Children's imagination knows no limits - they can play at being climbers, explorers, or stunt performers. This rope play product is made of hot-dip galvanised steel with a high-quality surface finish, and the joints are stainless steel and covered with plastic protective caps to increase the safety and service life of the connections. The ropes are made of polyester fibers wound around a central core. This rope construction increases its strength and resistance to mechanical stress. Polyester itself has many positive properties: it is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. The A-Frame Rope Structure is certified according to STN EN 1176.

Specifications

The A-Frame Rope Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	2.10 x 1.50 x 1.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	5.20 x 4.50 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, polypropylene rope, stainless steel fasteners
