

## Small Rope Igloo with Tunnel

Small Rope Igloo with Tunnel

This small rope igloo features three side rope nets and a central rope 'funnel', complemented by suspended balance stones. The product is made of galvanised steel with a high-quality powder-coated finish, and the joints are made of stainless steel and covered with plastic protective caps to increase safety and extend the service life of the connections. The ropes are made of polyester fibers with a steel core, wound around a central axis. This rope construction increases strength and resistance to mechanical stress. Polyester itself offers many positive properties: it resists microorganisms and weathering, dries quickly after rain, is color-stable, and features high strength.

### Specifications

The Small Rope Igloo with Tunnel is certified according to STN EN 1176

|                               |                                                                                              |
|-------------------------------|----------------------------------------------------------------------------------------------|
| <b>Age Group:</b>             | 3-14 years                                                                                   |
| <b>Product Dimensions:</b>    | 3.60 x 4.00 x 2.20 m (L x W x H)                                                             |
| <b>Max. Fall Height:</b>      | up to 2.20 m                                                                                 |
| <b>Safety Surfacing Area:</b> | Ø 8.00 m (according to STN EN 1176-1)                                                        |
| <b>Materials:</b>             | Galvanised and powder-coated steel, HDPE, HPL, polypropylene rope, stainless steel fasteners |
