

TWISTULA Object

LTW409

The picture is only illustrative, it may not exactly match the product described.

Product description

The design element consists of a single piece of solid wood, to which two galvanized legs are attached from the bottom with screws. **The wood is constantly being worked on and significant cracks underline the natural appearance of the material and therefore the surface can be of a rougher nature. As a result of climatic conditions, the natural aging of wood occurs, which is manifested by graying or blackening.**

Material

Construction: steel grade 11
Solid wood: douglas fir, oak
