

Single-Tower Play Structure

Single-Tower Play Structure

A single-tower combined play structure with a tower that children can climb using a ladder or a sloped rope climber, then descend via the slide. The green-brown, nature-inspired design invites children to play even from a distance. The HPL material used is chemically resistant, UV-resistant, colorfast, non-toxic, recyclable, and shatter-resistant, preventing injury from sharp edges or fragments. The posts are made of BSH laminated timber beams treated with a weather-resistant and UV-resistant coating. All joints are made of stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

The Single-Tower Play Structure is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.00 x 0.90 x 3.20 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.00 x 4.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, PA, HPL panels min. thickness 6, 10, and 13 mm, HDPE plastic, stainless steel fasteners
