

Slide with Swing

Slide with Swing

This certified, maintenance-free A-frame tower combines a rung ladder with a slide and is complemented by a double hanging swing featuring a classic seat and a baby seat. The baby seat includes a protective enclosure with a crossbar between the child's legs to prevent slipping or falling during swinging, while also providing back support. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels and HDPE plastic components are chemically resistant, UV-resistant, color-stable, non-toxic, recyclable, and resistant to breakage - eliminating the risk of injury from sharp edges or splinters. All fixings are stainless steel and covered with plastic protective caps to enhance durability and safety.

Specifications

Slide with Swing is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.10 x 2.80 x 1.90 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.50 x 7.10 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, PA, rubber, stainless steel fasteners and chains
