| Product description | Steel weldment carrying concrete board made of concrete class C 30/37 with dimensions 600×600×50 mm. The concrete surface of the table is attached to the central leg of dimensions 60×60×3 mm, which ends with a plate for anchoring to the base. The game board for Go is created by pouring black concrete into a light board matrix.                                  |
| Material            | construction: stell grade 11, concrete class C 30/37                                                                                                                                                                                                                                                                                                                      |
| Surface treatment   | Concrete in shades natural light and anthracite.<br>Galvanized steel treated with powder coating in colour variations: RAL 7016 (anthracite grey), RAL 9005 (jet black), RAL 9006 (white aluminium), RAL 9007 (grey aluminium), RAL 9003 (white), RAL 3003 (red), RAL 6021 (green), shade of Corten (rusty).<br>Other RAL shades according to RAL sampler on request only |
| Dimensions          | 600×600×740 mm                                                                                                                                                                                                                                                                                                                                                            |
| Anchoring           | Anchoring is done with four stainless steel threaded rods M10 of length min. 100 mm and four nut cover caps M10 with a chemical anchor into concrete foundations prepared in advance.<br>A detailed drawing is available for download on the website for each particular product.                                                                                         |
