

SANTO Bicycle stand

SKS1

The picture is only illustrative, it may not exactly match the product described.

Product description	A supporting parking system for bicycles. The basic element of this bicycle stand is a steel weldment containing a special rubber EPDM profile on its periphery. This rubber profile protects the structure from its possible damage. The holes in the precise metal flame-cut part are used for passing a bicycle lock through. It is possible to include a text or logo into the precise metal flame-cut part. At the bottom part there is an anchor plate with four holes for anchoring to the base.
Material	Steel grade 11, EPDM material
Surface treatment	Galvanized steel treated with powder coating in colour variations: RAL 7016 (anthracite grey), RAL 9005 (jet black), RAL 9006 (white aluminium), RAL 9007 (grey aluminium), RAL 9003 (white), RAL 3003 (red), RAL 6021 (green), shade of Corten (rusty). Other RAL shades according to RAL sampler on request only.
Dimensions	238×34×900 mm / 12 kg
Anchoring	Anchoring is done with four stainless steel threaded rods M10 of length min. 200 mm and four nut cover caps M10 with a chemical anchor into concrete foundations prepared in advance. A detailed drawing is available for download on the website for each particular product.
