

TOMI Bicycle stand

SKT6

The picture is only illustrative, it may not exactly match the product described.

Product description

The construction is from steel weldment made of steel parts 40x40x3 mm and metal sheet burn parts 6 mm thick. A rubber profile (EPDM) with a width of 50x5 mm is fastened along the inner vertical structure of the stand. The rubber profile is wider than the steel structure, thus preventing the bicycle from coming into contact with the metal part of the stand. At the bottom part there are welded stainless steel plates with holes for possible anchoring to the base.

Material

Steel grade 11, EPDM material

Surface treatment

Galvanized steel treated with powder coating in colour variations:
RAL 7016 (anthracite grey), RAL 9005 (jet black), RAL 9006 (white aluminium), RAL 9007 (grey aluminium), RAL 9003 (white), RAL 3003 (red), RAL 6021 (green), shade of Corten (rusty).
Other RAL shades according to RAL sampler on request only.

Dimensions

600x50x900 mm

Anchoring

Anchoring is done with four stainless steel threaded rods M10 of length min. 100 mm and four nut cover caps M10 with a chemical anchor into concrete foundations prepared in advance.
A detailed drawing is available for download on the website for each particular product.
