| Product description | The structure consists of two cast-iron side panels, on which wooden boards of the following dimensions are fixed: 2 boards of rectangular cross-section (117x26 mm), 1 board of rectangular cross-section (92x26 mm) and 2 boards of an atypical arch profile. They are attached to the structure with stainless steel screws. The assembly of plates is reinforced in the middle with a steel strip.                                                                                                                        |
| Material            | Construction: cast iron, steel strip<br>Solid wood: oak, wood pine ThermoWood®, tropical wood                                                                                                                                                                                                                                                                                                                                                                                                                                 |
