

TWISTULA Object

LTW500

The picture is only illustrative, it may not exactly match the product described.

Product description	The design element consists of a seat made from a substantial solid timber beam with a cross-section of 400 × 400 mm, to which a steel base is attached from the underside using screws. The wood is constantly being worked on and significant cracks underline the natural appearance of the material and therefore the surface can be of a rougher nature. As a result of climatic conditions, the natural aging of wood occurs, which is manifested by graying or blackening.
Material	Construction: steel grade 11 Solid wood: douglas fir, oak
Surface treatment	Hot-dip zinc. Douglas fir – without surface treatment Oak – without surface treatment
Dimensions	400×400×440 mm (± 4 %) / 52 kg
Anchoring	Anchoring is done with four stainless steel threaded rods M10 of length min. 200 mm and four nut cover caps M10 with a chemical anchor into concrete foundations prepared in advance. A detailed drawing is available for download on the website for each particular product.
